

Physician Scope of Practice

A statistical approach to profiling practice patterns

Canadian Institute for Health Information

Motivation

- Raised at advisory group meeting last year
- Physicians practising differently than expected
- How much does physician specialty inform Scope of Practice

What is Scope of Practice?

Daily clinical activities
that describe the health
care being delivered

- Consultations
- Assessments
- Surgical Procedures
- Therapeutic Procedures
- Diagnostic Procedures
- Etc....

Describing Physician Activities

- **Physician Specialty**
- **Precise description of skills and credentials**
- **Complete listing of clinical activities i.e. fee codes**
- **National Grouping System Categories**

NGS Categories

Comparing Physician Services

- **Physician services are described differently in different jurisdictions**
- **Provincial Fee Schedules**
- **National Grouping System categories give a framework for organizing fee codes into a comparable groupings**

NGS Categories Examples

CONSULTATIONS

major consultation

MAJOR SURGERY

rhinoplasty

DIAGNOSTIC & THERAPEUTIC PROCEDURES

colonoscopy

MAJOR ASSESSMENT

office assessment

OBSTETRICAL SERVICES

caesarean section

Practice Areas

The Idea

Reorganize NGS categories into homogenous groupings called practice areas

Measure participation within each practice area

Participation patterns define unique practice patterns for each physician

The Practice Areas

consultations

MAJOR CONSULTATIONS

OTHER CONSULTATIONS

psychotherapy

INDIVIDUAL PSYCHOTHERAPY

GROUP PSYCHOTHERAPY

COUNSELING

assessments

OFFICE

HOSPITAL INPATIENT NEWBORN

HOSPITAL INPATIENT OTHER

HOSPITAL OUTPATIENT

HOSPITAL UNSPECIFIED

UNSPECIFIED

obstetrical services

SERVICES AT TIME OF DELIVERY

VAGINAL DELIVERY

CAESAREAN SECTION

THERAPEUTIC ABORTIONS

OTHER OBSTETRICS

musculoskeletal surgery

FRACTURES

ARTHROPLASTY – HIP

ARTHROPLASTY – KNEE

OTHER MUSCULOSKELETAL

etc...

Scope of Practice Categories

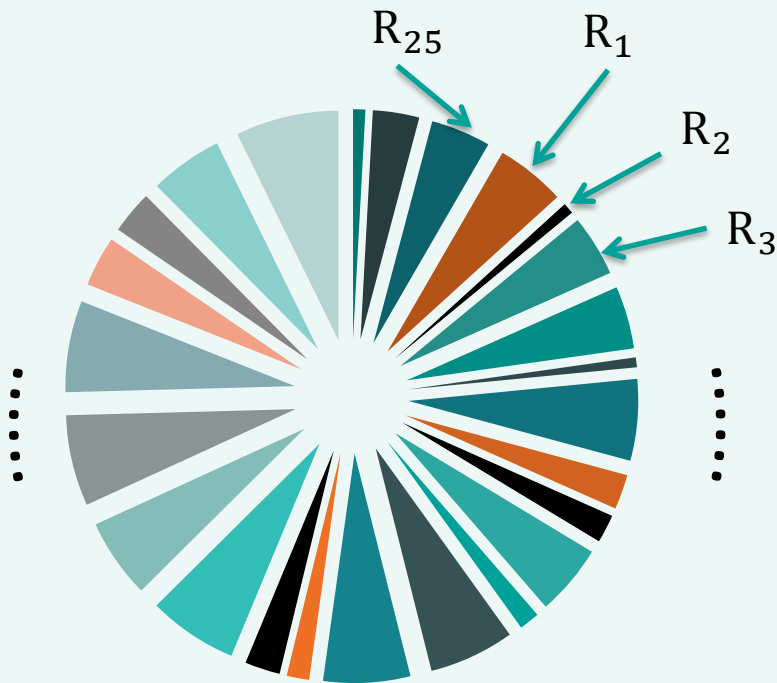

Assigning a Scope of Practice – the Setup

Basic assumption:
physicians within a given
specialty represent a
group of like-behaving
individuals the majority
of who practise in
similar ways.

- Choose a specialty, s
- Let PA_i denote the i^{th} practice area
- For each physician let p_i represent their total payments for PA_i
- We'll associate a scope of practice category Π_s to each specialty

Assigning a Scope of Practice – the Math I

Dr. WHO Payments by Practice Area

- For each physician we define their **participation rate sequence** as follows:
 $R = (R_1, \dots, R_{25})$ where

$$R_i = \frac{p_i}{P}$$

and $P = \sum_i p_i$.

- Each R_i is a **relative measure of participation** within the practice area PA_i .

Think Pie

Assigning a Scope of Practice – the Math II

- Does Dr. WHO have a typical practice pattern for his specialty?
- Need to define what is the *most typical participation rate sequence* for the specialty
- In other words we want to most representative pie chart

For each specialty group s , we define the *payment signature of s* , denoted $t_s = (t_{1,s}, \dots, t_{25,s})$ as follows:

$$t_{i,s} = \frac{m_{i,s}}{\sum_j m_{j,s}}$$

where $m_{i,s} = \text{median}\{R_{i,1}, \dots, R_{i,N}\}$ and where $R_{i,j}$ denotes the participation rate value in the i^{th} practice area for the j^{th} physician in specialty group s .

Assigning a Scope of Practice – the Assignment

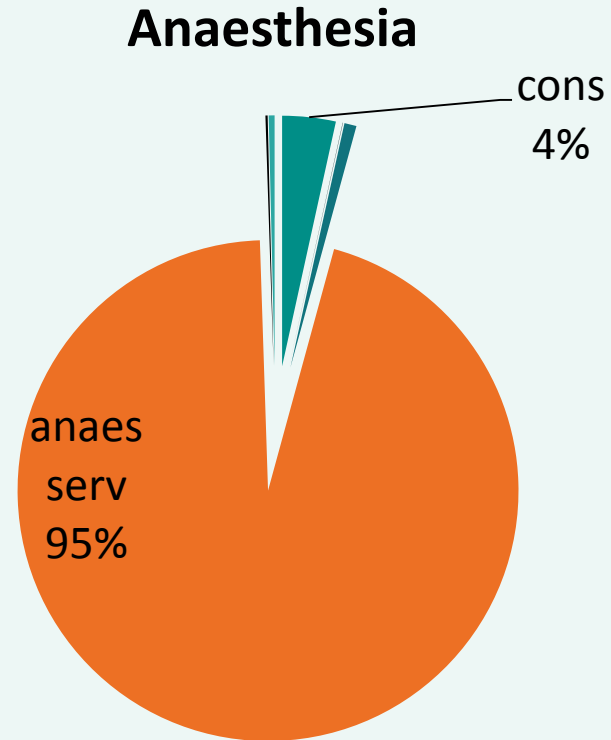

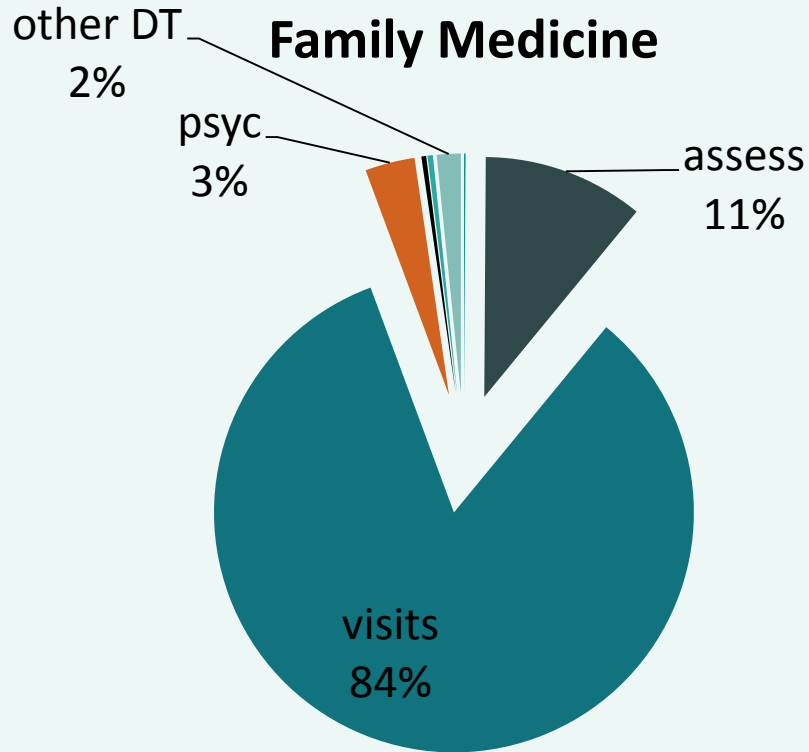

- Let $R = (R_1, \dots, R_{25})$ denote the participation rate sequence for Dr. WHO
- We say that their *scope of practice* is most similar to the specialty group s when

$$\min_{l \in spec} \{d(R, t_l)\} = d(R, t_s)$$

where $d(R, t_l) = \sqrt{\sum_i (R_i - t_{i,l})^2}$ is the Euclidean distance between the tuples.

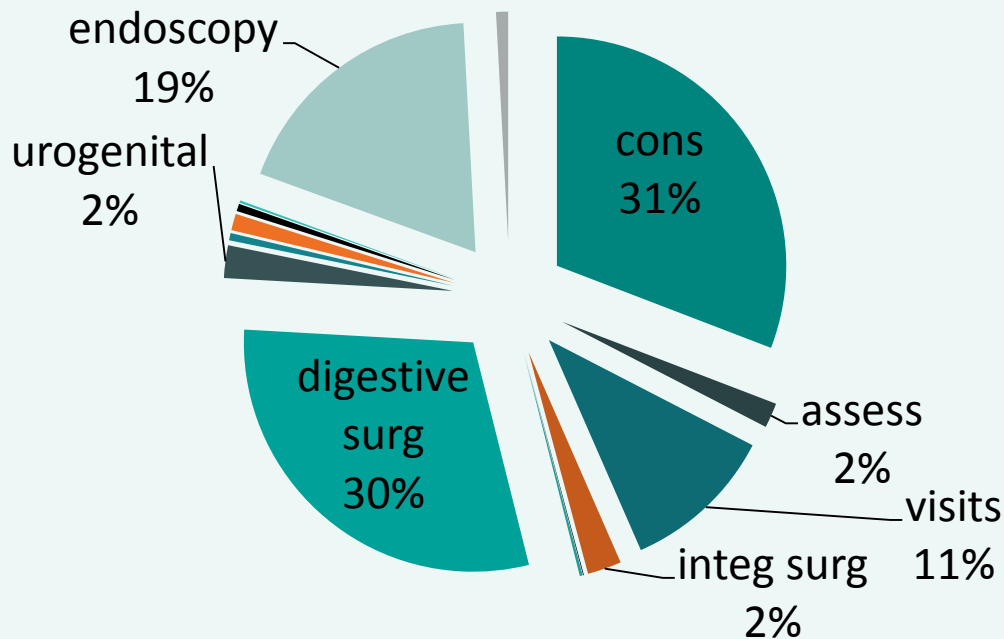

Examples

Scope of Practice as a Pie Chart – the Payment Signature

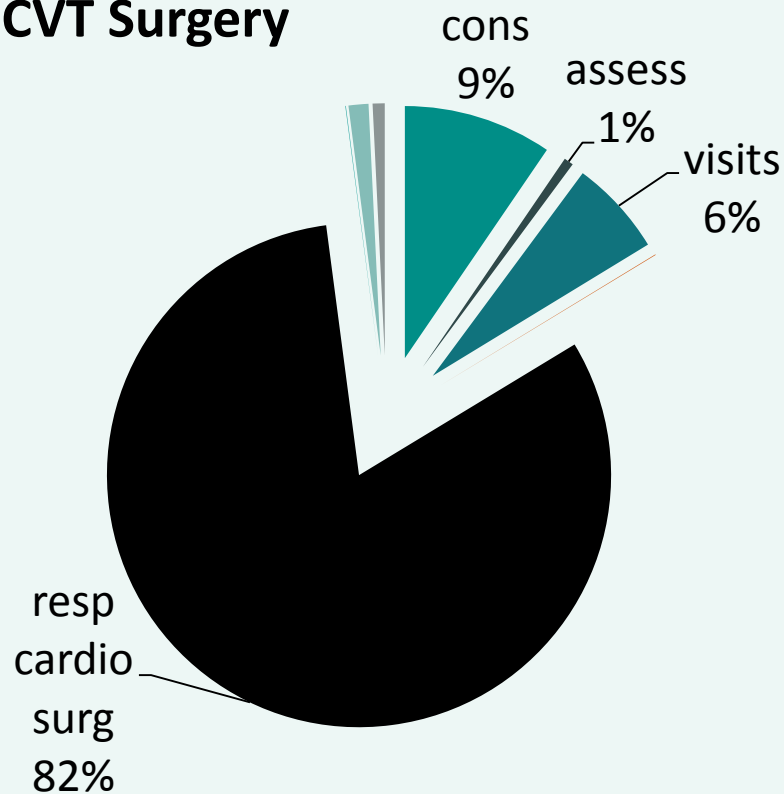

Scope of Practice as a Pie Chart – the Payment Signature

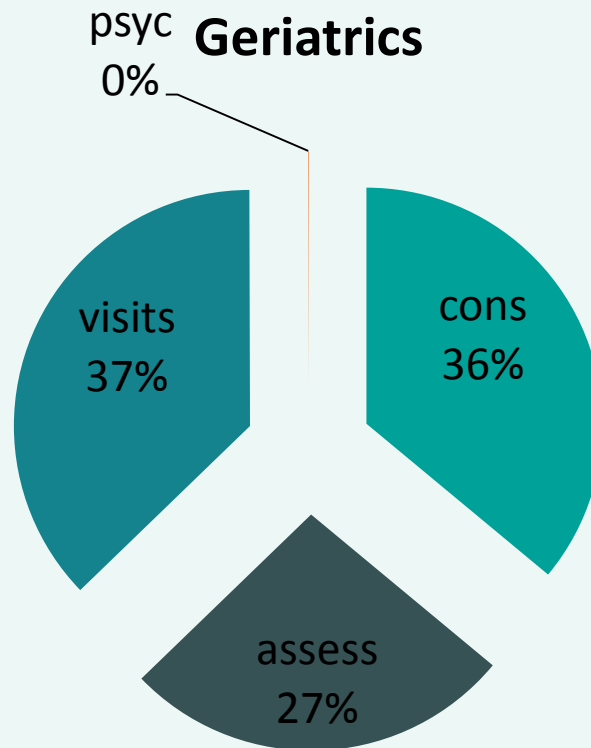

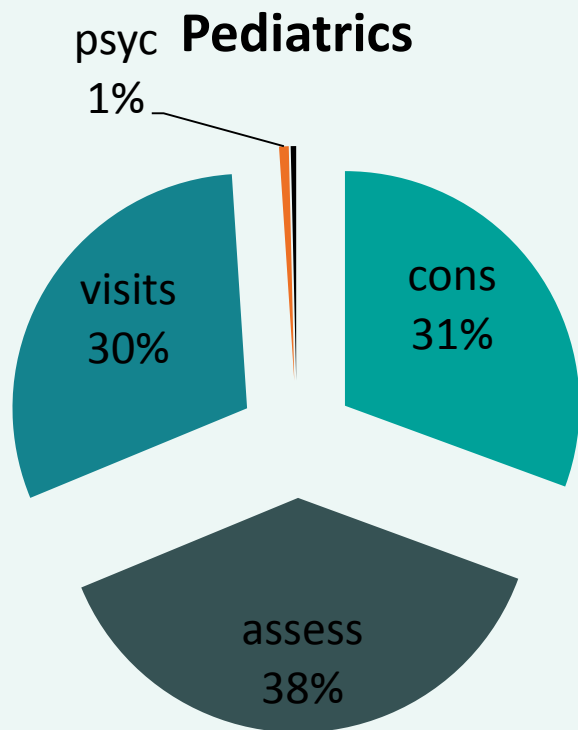

General Surgery

CVT Surgery

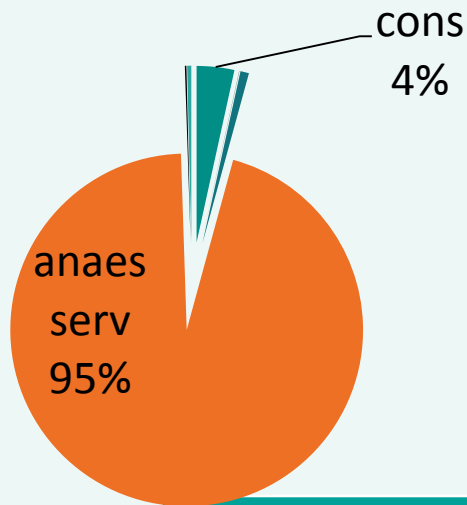

Scope of Practice as a Pie Chart – the Payment Signature

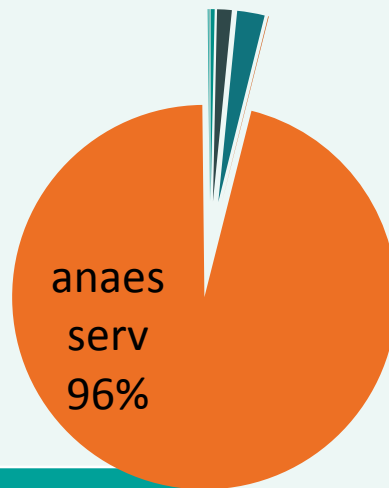

Identifying Scope of Practice

Anaesthesia

it's a
match!
...
but

Dr. WHO

NPDB Specialty	Family Medicine
Total Payments	\$405,000
Actual FTE	1.51
Functional Specialty	Anaesthesia
Expected FTE	1.19

Next Steps

- Work at refining the practice areas
- Explore other options for defining the centroid of a scope of practice cluster
- Analyze the dissimilarity between clusters
- Develop a clinical description of the scope of practice categories
- Look at the evolution over time
- Incorporate Alternative Payments
